

Sevenstar Adds More Worldwide Reps

Sevenstar Yacht Transport has appointed Stargate Shipping and Navigator Shipbrokers as its representatives in Germany and New Zealand, respectively.

With the addition of Sevenstar, Stargate's offices in Hamburg and Bremen will represent the largest yacht transportation group in Europe, with more than 500 worldwide transports per year, including monthly service out of the Baltic/Holland and Southampton to the Mediterranean Sea.

Based in Auckland, Navigator Shipbrokers specializes in the shipment of yachts and project cargoes into and out of New Zealand. With four scheduled sailings from New Zealand to the northern hemisphere in 2006, Navigator can supply the South Pacific market with regular yacht transport.

Sevenstar's head office is in Amsterdam, where it oversees a global network of agencies in the UK, Germany, Finland, Monaco, Palma de Mallorca, Canada, Mexico, Florida and New Zealand. www.sevenstar.nl

► IT'S REVOLUTIONARY!

We've all been there, charging our cell phones or using a hair dryer and needing to use the adjacent socket but can't because of the humungous electrical plugs that take up so much space. 360 Electrical has come up with a solution that eliminates the hassle of fitting more than one large plug to a standard electrical wall socket. It developed a twisting power socket, featuring insets that swivel around to accommodate two large plugs at once. www.360electrical.com

► THE BEAUTY OF BRASS WITHOUT ALL THE WORK

Cleaning and restoring brass and bronze fixtures on board can be a time-consuming task and could never be described as a stew's favorite job! ABI/Precision Lighting developed TitanTuff, a process that utilizes physical vapor deposition (PVD) to provide the beauty of brass without all the work.

The four-part process, which involves high-purity cleaning, contaminant removal and ionization, forms a dense metal compound that is as hard as carbide. It has a rich brass appearance and is three times more abrasion resistant than chrome. The products can be easily cleaned with glass cleaner or mild soap and water. Being UV proof, the coating will never fade, tarnish or need polishing, won't pit like chrome finishes and carries a 20-year finish guarantee. www.abimarine.com
