## Ashland-e Series Recycled Glass Tile

**Hakatai Enterprises** has improved and expanded its popular Ashland Series. The new Ashland-e Series is comprised of between 30 and 70 percent recycled glass from bottles and/or other waste glass. In addition to the new content, Hakatai has added new colors, sizes and finishes.

**Circle 105**

## BellaStone Architectural Column

Featuring all the detail, shadowing and texture of fine, quarried stone, but without needing installation by a professional stonemason or ongoing maintenance, the new BellaStone Architectural Column from **Exterior Portfolio by Crane** provides homeowners with beautiful stone accents for homes, landscaping, fencing and porch railings. Each BellaStone Architectural Column is 20-in. square and available in two sizes: 16 or 38 in. tall.

**Circle 106**

## Rotating Receptacles

**360 Electrical** introduces a line of wall outlets with receptacles that rotate a full 360 degrees in both directions. These outlets are ideal for strategic locations in homes and offices where products with large plugs are most heavily used.

**Circle 107**

## LiteSteel Beam

LiteSteel Beam from **LiteSteel Technologies** is a structural beam with the strength of steel but with workability and ease of installation associated with wood products. LSB is on average 40 percent lighter than hot rolled steel and engineered wood beams of equivalent performance. The innovative, patented cold forming process gives LSB a unique profile with the torsional rigidity normally expected from hot rolled steel.
